Some notes: ALCo demo 1953E shows two serials; first one enters in a batch of serials of locos made in Spain the other matches the date's sequence (but surrounded by ALCo-built locos); maybe the demo had to be refurbished and regauged in Schenectady.

Contract M6108 was given to EMAQ, a Brazilian company, that agreed with CAF the assembly of the serials given by CAF are not known (at least by me:)

M6117: I have those listed also as made by Bombardier

G6046: From this order there were two locos built with road #4045: first one was quickly transferred to 9416; so there was a second one made to cover the gap

Goodwin went out of business in 1972; some jobs that were in process by then were completed later

This list was made using an ALCo production list that starts in 1951; several locos built earlier are not in it (they were bought by Brazilian railroads)

There are LOTS of problems with model designation; it looks to me that a model was designed that designated RSD-8 just because a drunk employee of ALCo-MLW-Goodwin said that; I really wonder about the model designation (specification number is a bit more clear)

Russian locos were renumbered when they arrived as Da.20-1 to Da.20-58, with twelve locos sunk by the Germans

Euskalduna serials 491-500 (DL-535B for Ecuador) was ordered to ALCo as 3402-1/-10. Order late

The East African Railways was an enterprise that owned a network covering the countries of Kenya and Uganda. It disappeared in 1976. Then, the national governments of these countries created national railways to continue state-financed operations. Locomotives were split between the new national railroads.

(*) Contract was named by ALCo as order E3410-1 to -52; Euskalduna applied its own serials to the locos but CAF didn't do the same.

Euskalduna serials:	389-414: RENFE 2109-2134
	415-440: RENFE 2135-2160
	441-480: RENFE 1301-1340
	481-490: RENFE 2161-2170
	618-627: RENFE 2171-2180

Information on ALCo powered GE locomotives from Phil Wormald's GE Export site and Gustavo Bonetto's "Guia de Locomotoras diesel Argentina"
